

Bucket Truck Training Mississauga

Bucket Truck Training Mississauga - The Vehicle-Mounted Aerial Work Platform or bucket truck training program is designed to decrease the possibility of incident and personal injury when working with or in close proximity to bucket trucks by efficiently training qualified operators. An aerial lift device is whatever vehicle-mounted device, telescoping or articulating, or both, that is used to position employees to reach locations that would otherwise be not accessible. Aerial lift devices are used to be able to elevate personnel to above-ground work sites.

The objective of the program is to provide operators with the skills, knowledge, abilities, and training materials necessary to be able to learn to operate vehicle-mounted aerial work platforms effectively and safely.

The program consists of a hands-on training session and a classroom training session. To be able to become certified, participants should be successful in both components. A full-size certificate and a wallet-size certificate will be given upon finishing the program.

Types of lifts consist of extensible boom platforms, articulating boom platforms, aerial ladders and aerial ladder trucks, vertical towers and any combination of these devices. Aerial lift devices are normally constructed with wood, metal, fiberglass, reinforced plastic or other materials.

Definitions

Articulating boom platform: has two or more hinged boom parts.

Extensible boom platform: has an extensible or telescopic boom.

Platform: part of the aerial device which is designed to carry workers.

Mobile unit: any aerial device together with its components like for instance vehicle and related machinery.

Employers have the responsibility to make certain their worker receive proper training prior to operating aerial devices. Workers must make certain they likewise acquire the required training and that they do not operate lift devices if they are not authorized to do so. Workers must ensure that they have on the proper protective equipment while working from the platform.

The course content utilized in the bucket truck training program comprises the operation of the vehicle-mounted aerial work platform, pre-shift inspections, safe operating practices, use of emergency controls, lifting capacity, and administering practical and theory tests. Operators would be familiar with legal requirements under the federal and local regulations.
