

Order Picker License Mississauga

Order Picker License Mississauga - Order preparation operation or order picking as it is more normally known is a process used within warehouse operations and comprises personnel called order pickers. The order picker's job is to take and collect articles in specific quantities to be able to accomplish the customer's orders prior to shipment. Order picking is a basic warehousing method. The effectiveness in which this job is completed can be directly connected to the productivity of a supply chain. Therefore, order picking is among the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are certain types of order picking which consist of: wave picking method, pick to box method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the items from her or his station. The box then moves to other picking stations until the client order is finish. In this particular technique, there is no movement of the order picker workers. In the wave picking method, the order pickers move round so as to gather the required things for several orders. The picker to part method or piece picking is similar where the order picker or pickers move to collect the stuff needed but for one order only.

In the sorting systems method, there is no movement of the order picking employees. Instead, the products are brought to him or her by means of an automated system like a conveyor system or an automatic storage. In the zone picking method, each and every order picker is assigned to one specific zone. They are responsible for just realizing order picking in this specific zone.
