

## Boom Lift License Mississauga

Boom Lift License Mississauga - To be able to operate an aerial boom lift, operators should be certified through training which could be attained using both classroom sessions and practical training and by attaining a boom lift license. Instruction must be given with respect to the type of aerial lift which will be used on the job. A License is required for anyone who operates or works on an aerial boom lift.

Vehicle-mounted aerial devices include the following work vehicles: aerial ladders, extensible boom platforms, vertical towers, articulating boom platforms, and whichever combination of these types.

When using a boom lift, there are several basic safety regulations that apply to all boom lifts. Safety of the worker is a top priority whilst they are working inside the basket. The worker must at all times have on a body harness and lanyard, attaching it to the basket or boom. Never tie off to an adjacent pole, structure, or equipment. Personnel must stand on the basket floor, and never climb or sit on the edge of the basket. The manufacturer's load limitations must be adhered to.

Lift operators have to be authorized to operate an aerial lift. The manufacturer's guidebook should be kept within the lift and the operator must know all aspects of that particular unit. Operators are responsible for ensuring that safety measures are followed in operating the lift. A daily test of lift controls should be carried out. Set brakes and position outriggers (if they are used) on pads or a stable surface. If working on a slope, utilize wheel chocks.

Never move an aerial lift truck with an elevated boom whilst workers are inside the basket. Extensible boom platforms and articulating boom utilized as employees carriers should have plainly marked, accessible, upper controls. Except in emergency cases, lower controls must not be used to override upper controls unless the person inside the lift gives consent.

Do not wear tree or pole climbers shall while working from an aerial lift.

The insulated part of the aerial lift should not be altered.

Do inspect the booms to ensure it is correctly cradled and the outriggers are in the stowed position prior to moving.

When operating a boom lift next to power lines, make certain that the lines are di-electrically tested according to local regulations.
