

## Counterbalance Forklift License Mississauga

Counterbalance Forklift License Mississauga - Forklifts, when operated by completely trained workers, are a major advantage to companies. We offer a comprehensive training program consisting of all aspects of operating a powered lift machine. Counterbalance forklift training offers operators of forklifts with the practical skill and knowledge needed in order to operate forklifts safely and efficiently. The program offers a combination of classroom theory, hands-on training and participant observation in a warehouse-type environment. Training can be customized and/or on site.

The course goes through the lift truck essentials, rules and regulations, components, load centres and factors affecting stability. Procedures regarding the general operation of the forklift is taught, in addition to circle checks, startup, forward/reverse on level ground, shutdown, and operating around other individuals. Load handling subject matters include selection of loads, load pickup and placements, loading and off-loading trailers and load security and integrity. Individuals participating would learn operational maintenance procedures, such as recharging and refueling. Safety issues in the workplace will be talked about. Participants would learn about the environmental conditions affecting lift truck performance and be able to identify potential hazards. Advanced training on propane handling can be incorporated.

Employers and their employees can face penalties if they do not operate according to national and industry standards. Workers operating a counterbalance forklift should be well-informed concerning the safe operation guidelines of their forklift. Training is recommended for any individual applying for work that needs forklift operation.

We provide hands-on training and in-class theory in small, personalized classes. Training options comprise refresher or entry level courses.
